

SPECIFICATION GUIDE – FORMED GLASS

Features

Formed is a range of textured glass where one face has been formed over a patterned mould to create a unique finish to every panel of glass. Formed is the ideal product to apply transparent coloured finishes and is wonderful medium for corporate logos and text.

Uses

Formed is ideal for screening where the transmission of light is still required. Formed can be used for shower screens, balustrades, frameless doors, feature windows and many other applications. Formed is also ideal for water features and all external uses as the nature of the product makes it impervious to general wear and tear that other products may experience.

Manufacturer: Axolotl

Process: Formed

Glass type: Clear, Low Iron, Bronze, Grey, Green, Starfire,
