

## SPECIFICATION GUIDE – VEIL and VEIL + GLASS

### Features

Veil is a range of soft carved glass available in a standard range of patterns or custom designs. Carving offers the opportunity to work either one or both faces of the glass, increasing the range of optical effects available in the finished piece.

### Uses

Veil is ideal for screening where the transmission of light is still required, combined with the ability to manage the level of visual obscurity. Veil can be treated to either one or both faces and obscurity can vary with an open weave (clear glass between patterns) or a closed weave (overlapping carved areas).
